Abstract

This document expands the original minimal template. It demonstrates how to include figures, equations, theorems, and simple tables. Use this as a starting point for longer documents.

Contents

1	Introduction	2
1.1	Goals	2
2	Mathematics	2
3	Figures	2
4	A Small Table	3
5	Conclusion	3

1 Introduction

This is a basic LaTeX document template that has been developed with a few common features.

1.1 Goals

The goals of this expanded template are:

- Show how to include images.
- Provide examples of mathematical environments.
- Include a small table and a theorem.

2 Mathematics

Here is an example of a simple inline equation: $a^2 + b^2 = c^2$.

And here is a numbered equation using the `align` environment:

$$E = mc^2, \tag{1}$$

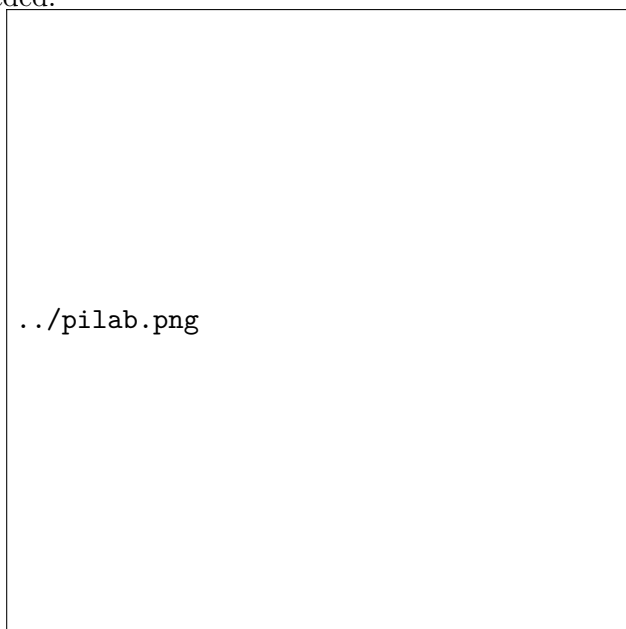

$$F = ma. \tag{2}$$

An example theorem:

Theorem 2.1. Let $f(x) = ax^2 + bx + c$ with $a \neq 0$. Then f has at most two real roots.

3 Figures

Below is an example figure included from the local folder (file: `pilab.png`). Adjust the filename if needed.

Name	Value	Note
Alpha	42	example
Beta	3.14	example
Gamma	0	example

Table 1: A simple table using `booktabs`.

4 A Small Table

5 Conclusion

This is the end of the developed template. Remove or adapt sections as required.
